

Claricent

Your Resource for Innovative, Practical BI Solutions

Are you looking for a BI solution that is robust, practical, and can keep up with your expanding needs for business analytics? Claricent has the expertise, resources, and flexibility you need. We're a team of SAP® technology experts and information management specialists with a long track record of building proven, creative SAP NetWeaver Business Warehouse solutions for mid-market enterprises. We offer a holistic and pragmatic approach designed to help you meet – and exceed your goals.

Creative Solutions, Robust Functionality, and Rapid Implementation

Our team of experts looks at where you are and where you're going. We develop solutions that get you there quickly. Solutions that stay ahead of your growing need for business analytics. Solutions everyone, at all levels of your organization, can use.

Claricent's top-notch team of SAP Technology experts and information Management specialists has been perfecting their knowledge and strategic approach for more than 10 years. Our skilled consultants offer a unique blend of data modeling, database management, information architecture, solution design, performance tuning, and analytic skills.

We listen to your requirements, understand your goals, and then mold SAP NetWeaver BI to your enterprise to function as a true Enterprise Data Warehouse. We utilize the best technology – hardware, software, and

services – to fast track your information management initiatives and help you solve real-world information management issues.

Partnering for Innovation

Claricent has joined forces with leading-edge hardware and software companies to develop innovative solutions to the unique BI challenges facing mid-market enterprises. From affordable BWA accelerators, to groundbreaking cloud-based geospatial services, and cutting-edge monitoring tools, we deliver world-class solutions that move your business forward.

Virtual Consultant Remote Development & Support

Claricent's unique Virtual Consultant Remote Support Service shortens implementation time. You receive a dedicated support professional, a project manager, and a personal portal with a direct, real-time connection to your remote team for the duration of your project.

Highlights:

- Fast track the adoption of business analytics
- Achieve significant ROI from your BI Investment
- Deliver powerful, dynamic, user-friendly dashboards
- Accelerate query processing with BladeRocket Business Warehouse Accelerator (BWA)
- Integrate location-based analytics with GeoCruncher, Geospatial Analytic Services
- Monitor performance with CanaryCode Monitoring Software

Why Choose Claricent?

- **Increase revenue.** Empower your team with the knowledge needed to improve sales performance and impact your bottom line.
- **Maximize productivity.** Develop strategic business objectives, identify spending inefficiencies, and make informed decisions that help you maximize

productivity and increase your return on investment.

- **Drive more value from your existing data.** Do more than just gather information. Analyze and interpret your information, then develop custom solutions based around your unique business requirements.

- **Discover a partner in success.** Receive prompt, friendly, personalized service. Develop a working relationship that's founded in solid values, based in business intelligence, and fueled with a sense of purpose.

Staff Augmentation

With our extensive network of staff consultants and independent consultants, expert in SAP BI, we can meet all your staffing needs. We match the right consultant to your project by focusing on your technical and cultural environment, the skills and personal qualities required, and your project and deliverables.

Blazingly Fast Query Processing with BladeRocket

Claricent's BladeRocket™, is the first and only affordable Business Warehouse Accelerator (BWA) for mid-market enterprises. BladeRocket incorporates low-cost, industry-standard hardware and SAP's industry leading software, bundled with configuration and installation services from Claricent's team of SAP experts.

GeoCruncher/GeoSpatial Analytic Services

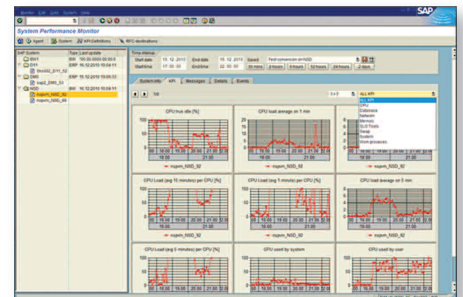

Spatial analytics adds new dimension to your business analytics. Claricent has partnered with Northstar Geographics to develop the most innovative geospatial analytics software service. GeoCruncher® is a revolutionary new service that gives you access to location-based analytics on datasets such as demographics, transportation/routing and social networking information, with no costly additions needed to your current infrastructure.

Dynamic Dashboard Integration Services

We create visually appealing and intuitive user interfaces, integrating a diversity of datasets that simplify the user experience and provide your organization's executives with ready-to-use, actionable data. With our deep expertise in SAP BI, data modeling, and visualization skills we can innovate and process large datasets within Xcelsius without using third-party tools and deliver superior dynamic dashboards.

CanaryCode Monitoring Software

Claricent is the exclusive distributor of CanaryCode, the cutting-edge monitoring tool from DataVard Ltd. CanaryCode provides a global view of performance on all your systems providing real-time alerts to protect your mission-critical BI applications against outages and service degradation.

Your Competitive Advantage

Our mission is to help you achieve a competitive advantage through information technology and SAP-based solutions. With more than 10 years of experience and a team of accomplished consultants, Claricent delivers the expertise, resources, and flexibility you need to develop innovative, robust, and practical BI solutions.
